

## **SAIC Awarded \$49 Million Task Order By Naval Surface Warfare Center - Dahlgren Division**

Company to Provide Systems Engineering and Analysis Services in Support of Combat Systems

SAN DIEGO and MCLEAN, Va., Aug 24, 2009 /PRNewswire-FirstCall via COMTEX News Network/ -- Science Applications International Corporation (SAIC) (NYSE: SAI) today announced it has been awarded a task order by the Naval Surface Warfare Center (NSWC) - Dahlgren Division to provide systems engineering and analysis support for combat systems. The follow on task order has a one-year base period of performance, four one-year options, and a total value of more than \$49 million if all options are exercised. Work will be performed primarily in Dahlgren, Va. The task order was awarded under the U.S. Naval Sea Systems Command SeaPort-e contract.

NSWC Dahlgren focuses on research, development, test, and evaluation in the fields of military safety testing, integrated warfare systems, weapons and ammunition, sensors and directed energy, and homeland and force (military personnel and equipment) protection. The agency translates the warfighter's needs into technical solutions within an operational context for the nation by developing and supporting systems, technologies, concepts and tactics that enable military forces to conduct their missions safely and effectively. Under the task order, SAIC will support NSWC Dahlgren's initiatives by helping introduce new technology into combat systems. SAIC will also provide technical and engineering expertise in support of total ship and combat system engineering, and research and development.

For more than 19 years, SAIC has supported NSWC Dahlgren," said Tom Baybrook, SAIC senior vice president and business unit general manager. "We look forward to expanding our relationship with this important customer by providing quality engineering services and technical expertise in critical warfare areas that affect combat systems across the surface Navy enterprise."

### About SAIC

SAIC is a FORTUNE 500® scientific, engineering, and technology applications company that uses its deep domain knowledge to solve problems of vital importance to the nation and the world, in national security, energy and the environment, critical infrastructure, and health. The company's approximately 45,000 employees serve customers in the U.S. Department of Defense, the intelligence community, the U.S. Department of Homeland Security, other U.S. Government civil agencies and selected commercial markets. SAIC had annual revenues of \$10.1 billion for its fiscal year ended January 31, 2009. For more information, visit [www.saic.com](http://www.saic.com).
