QUESTION # 9

This is about questions. Questions we must ask ourselves. Questions we must ask others.

We know this isn't right.

6% humidity doesn't make this sky.

Why do I have to wake up to this....

tragedy?

This is about questions...

Questions we must ask ourselves...

Questions we must ask others.

Who do you think you're fooling?

Not the smart ones.

We know this isn't a desert sky.

To those who enable the jets to spray, I ask...

Do you know what this toxic mist will do to us?

Do you know what the birds think about this?

What do the electromagnetic waves do to living things?

How do you know that your meddling
won't cause permanent damage or
catastrophe?

I ask, why do you lie?

How long do you think you can fool
everyone?

Why do you deny and try to hide in the
sky?

And whose children are you poisoning,
aside from your own?

I'd really like to know....

whose money are you using to buy fuel,

chemicals,

manpower,

airplanes,

and scientists to lie?

Do you pay misinformants as you would a public servant?

But mostly I ask, what gives you the right?

What gives you the right?

What gives you the right to decide that I will breathe this filthy air?

By what right do you kill living things?

By what right do you try to force me into your system?

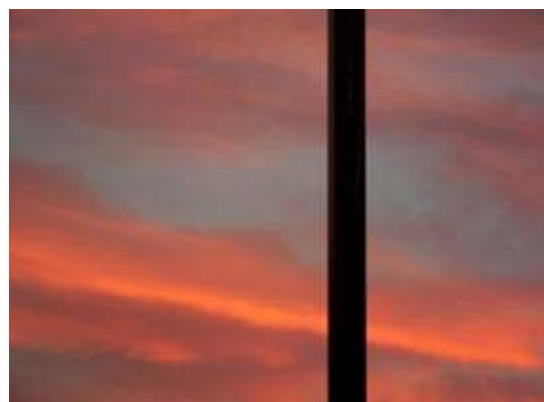

By what right do you decide what's good for me?

By what right do you take away the sun from the sky?

By what right do you let poison powders float earthward?

By what right do you hide the sky and lie,
and lie, and lie?

People, what's it going to take to get you to
turn off those bloody T.V. sets,

look up and take action?

What will it take to make you see how
many times you've been lied to?

Is this not enough?

What's it going to take to move you to
action?...

Genetically modified foods?

Pesticides in our DNA?

No clean air or fresh water?

Disappearing species?

No health care, education, or safety net?

Cancers?

What's it going to take to move the masses to action...

...before we all disappear?
